

Jhonathan Cutisaca

Full Stack Developer

I'm a Full Stack Developer experienced in JavaScript, React, and Node.js. I've successfully led web development projects, highlighting a successful e-Commerce project that involved implementing payment gateways, third-party authentication, and rigorous security measures.

My approach has enabled me to develop robust solutions both on the front end and back end.

My soft skills are a valuable asset that allows me to address technical issues in a unique and effective manner, communicate efficiently within teams, and successfully overcome challenges.

Work Experience

SoyHenry

Full Stack Teaching Assistant

- I coordinated a group of students to facilitate their integration into the study team.
- I assisted in solving exercises and encouraged group collaboration through Pair Programming.
- I suggested ideas for improving the Bootcamp processes.

Continuum Global Solutions

Customer Service

- As a Customer Service Advisor, my primary responsibility was to provide exceptional service.
- I handled a wide range of topics, including changes from prepaid to postpaid plans, technical mobile network issues, and account information and management.
- Key skills: Adaptability, user experience, efficient administration, effective technical support, and analytical capability.

Education

Completed Full Stack Web Developer Program at Henry Bootcamp

Projects

LadyFitLovers

E-commerce of women's activewear

- Led the development of an e-commerce platform focusing on Google and Facebook JWT authentication, Mercado Pago payment gateway, responsive web design, and NodeMailer integration.

Key Features:

- Implemented secure authentication via Google and Facebook JWT.
- Integrated Mercado Pago for safe and efficient transactions.
- Designed a responsive web interface for optimal user experience.
- Integrated NodeMailer for seamless email functionality.

Travels Dreamscape

Henry's Bootcamp Individual Project

- Developed a Single Page Application (SPA) focusing on the use of technologies such as React, Redux, Node, Express, and Sequelize.
- Implemented a CRUD system, enabling Create, Read, Update, and Delete functionalities within the application.
- Designed a responsive web interface to ensure an optimal user experience.

PI-Rick And Morty

Henry's Bootcamp Initial Project

- Developed an interactive platform for "Rick and Morty" enthusiasts as part of the initial project at Henry Bootcamp.
- Implemented user registration functions and character exploration, enabling users to add and remove favorites.
- Ensured an optimal user experience by making the application responsive.
