Jhonathan Cutisaca
Full Stack Developer

With a solid experience in key technologies such as JavaScript, React, Node.js, and PostgreSQL, I stand out for my focus on quality and detail. Creative, efficient, and always ready to tackle challenges, my ability to address technical issues and communicate effectively within teams ensures comprehensive and robust solutions in web development. Passionate about staying updated with the latest technological trends, I continually seek to optimize processes and enhance efficiency in every project.

Experience

Full Stack Developer
Anmedic

Nov 2023 - Apr 2024

I implemented and maintained critical system functionalities, such as user authentication and session management. I closely collaborated in the design and implementation of software architecture, following clean design principles and good development practices, ensuring system coherence and scalability. Additionally, I demonstrated skills in efficiently solving problems and debugging errors, guaranteeing the proper functioning and stability of the applications. Furthermore, I made significant contributions to the technical documentation of the project, creating clear and comprehensive user manuals to facilitate the use and maintenance of the applications by end users.

Full Stack Teaching Assistant
Henry

Aug 2023 - Oct 2023

Guided and coordinated students, easing their transition into the boot camp environment. Provided active support in solving exercises, promoting collaboration through Pair Programming. Contributed innovative ideas to enhance processes and the overall boot camp experience, fostering a more efficient learning environment.

Full Stack Developer – Note Nexus
Projects   *https://note-nexus.vercel.app/*

I faced the challenge of developing a note-taking application with user registration and complete CRUD functionality within a maximum timeframe of 3 days, successfully meeting the challenge. The project, created within a limited time frame, stands out for its aesthetics and functionality.

Full Stack Developer – Universe R&M
Projects   *https://universe-rick-and-morty.vercel.app/*

Performed the migration from the PERN stack to MySQL, Django, and React with TypeScript, incorporating new technologies and enhancing efficiency through a comprehensive CRUD system. Additionally, strengthened the project's robustness and optimized its overall performance.

Full Stack Web Developer – eCommerce/LadyFitLovers
Projects   *https://ladyfitlovers.vercel.app/*
Sep 2023 - Oct 2023

Led the development of an e-commerce platform, focusing on both the backend and frontend. Implemented authentication, roles, and improved responsive design. Recognized for integrating a secure payment gateway, detailed administration panels, and advanced security features.

Education

Full Stack Developer
Henry   *Buenos Aires, Argentina*
Jun 2023 - Oct 2023

Economics
Florencio Molina Campos   *Moreno, Buenos Aires, Argentina*
Mar 2012 - Nov 2017
